Thank you. I have forwarded the information to the engineering assessor for review. I will get in contact with Jay if we have any questions. Updated assessments typically take two weeks.

Best,
Bethany

FYI.
We need to alert Bethany by e-mail once you have modified and sent CDX.
Thanks
Ralph

Also, I forgot to mention yesterday, please send me an email when you submit anything through CDX. I eventually receive a notification, but sometimes it takes up to a week for the system to notify me.

Thanks,
Bethany

Hi Jay,

In order to actually revise our assessment, we do require the additional information in writing through CDX. It is easiest for us if you create PDF documents describing the procedures (in text and/or diagrams, including any technical rationale) and submit them as attachments to a "support form" or as attachments on an amended PMN. Any additional information not provided in the original PMN can be provided in a "support form," however, any changes to claims made in the original PMN require a PMN amendment.

Also, I have noted from our conference call that you made a few additional points about manufacturing procedures at your site, specifically cleaning frequency of the storage tank and the details of the reactor cleaning. Those details will also need to be included in order to revise the manufacturing releases accessed in the engineering report.

Majd and I are both available to answer any questions you have during this process. Feel free to call if something comes up.

Best regards,

I have reviewed the report and contacted a prospective customer in each category. We have their standard procedures including cleaning and drum disposal from each industry. How should I proceed, is another phone interview appropriate or do we amend our PMN submittal to show this information?

Thank you,

Jay Bartley
